EXPERIENCE

Full-Stack Software Engineer

Aug 2024 – Present

Ecolab

St. Paul, MN

- Built and shipped the Executive Business Review tool used by 500+ corporate area managers worldwide, delivering real-time operational insights through a responsive Angular and TypeScript UI backed by REST APIs in C# and .NET Core.
- Modernized data access layer by migrating legacy raw SQL to Entity Framework Core with indexing, async/await, and projection strategies, improving concurrent scalability.
- Applied design patterns (Repository, Factory, Strategy, and Store) across the stack, writing clean, extensible code and ensuring consistent data flow across page transitions and user interactions.
- Redesigned Snowflake data models to eliminate query performance bottlenecks in analytics workloads, cutting execution time by 20% while increasing API throughput.
- Took full ownership of a UI overhaul, migrating from SCSS to Tailwind CSS, establishing design tokens, custom utility classes, and component standards — reducing CSS bundle size by 30% and improving consistency across the application.
- Strengthened production reliability with secure Azure MSAL authentication flows, 98% automated test coverage (NUnit, Karma/Jasmine, Playwright), and Application Insights telemetry — cutting escaped regressions to near zero and issue resolution time by 30%.

Machine Learning Course Assistant

Jan 2024 – Aug 2024

Rochester Institute of Technology

Rochester, NY

- Led recitations for ML courses, covering supervised/unsupervised learning, model evaluation, and feature engineering.
- Evaluated and debugged assignments for 70+ students using NumPy, Pandas, scikit-learn, and PyTorch, ensuring correctness and performance of end-to-end ML pipelines.

SAP System Architect

Aug 2019 – Jul 2022

IBM

Pune, India

- Maintained 99.9% uptime across 9 SAP ERP systems serving as the supply chain backbone for Panasonic North America, supporting procurement, inventory, and logistics at enterprise scale.
- Owned end-to-end incident triage and resolution for mission-critical supply chain systems via ServiceNow, maintaining 98% SLA compliance across a high-stakes enterprise environment.
- Strengthened SAP Gateway security by designing and implementing custom Access Control Lists (ACLs), increasing system protection coverage by 80%.
- Identified operational inefficiencies in SAP monitoring workflows and independently drove automation using Blue Prism RPA, eliminating 90% of manual errors without external direction.

EDUCATION

Rochester Institute of Technology

Rochester, NY

Master of Science in Computer Science

Aug 2022 - May 2025

Symbiosis International University

Pune, India

Bachelor of Technology in Information Technology

Aug 2015 - May 2019

PROJECTS

GitGrove – Cross-platform desktop app built with Tauri that discovers and visualizes local git repositories – Rust-powered code statistics via tokei, language-breakdown and contribution-graph views, and persisted scan state across sessions.

Blurbot – Agentic pipeline that keeps a portfolio’s “currently working on” section in sync with live GitHub activity; drafts blurbs with Claude, self-critiques them against a style guide in a structured revise loop, and opens PRs via the GitHub API on scheduled GitHub Actions runs.

MyAnimeList Data Engineering and Analytics – Stored and queried 80M+ records across PostgreSQL and MongoDB. Applied the Apriori algorithm to extract user behavior patterns and indexing to increase query performance.

TECHNICAL SKILLS

Languages: C#, Rust, TypeScript, Python, SQL

Frameworks: .NET Core, Entity Framework Core, Node.js, Angular, Tauri

Databases & Cloud: Azure, PostgreSQL, MongoDB, Snowflake

Tools: Git, Docker, GitHub Actions, Playwright, NUnit, Claude, GitHub Copilot
